

18th Annual Members Conference

June 1-2, 2023

Overview

ACES' Annual Members Conference provides information relevant to its Members and Customers in the form of presentations from subject matter experts. The purpose of the conference is to provide attendees the opportunity to learn about market trends, factors affecting the industry and the associated risks, and tools they can use to enhance their operations.

After attending the Members Conference, Participants will be able to:

- Apply what you learn to help your organization understand the impact of the changing workforce and unemployment on business
- Better understand the role of nuclear generation in the future resource mix and the potential benefits of improved reliability as the industry strives toward net-zero carbon emissions
- Better understand the changing energy landscape and the impact on power supply portfolios
- Apply what you learn to help your organization assess the pros and cons of using artificial intelligence (AI) in business
- Better understand the impact of environmental regulations and resulting litigation on the electric industry
- Better understand the Inflation Reduction Act and how it may affect goals to reach net-zero carbon emissions from the electric industry
- Better understand the impact of distributed energy resources on the future power grid
- Better understand current trends in the power and natural gas markets and the impact on your operations
