

2023 ACES Risk Managers Forum

August 24-25, 2023

Overview

The annual ACES Risk Managers Forum (Forum) provides education and information in the form of subject matter expert presentations, panel discussions, break-out sessions, and Member spotlights. The purpose of the Forum is to give individuals with risk oversight and risk management responsibilities the opportunity to network with each other and obtain information and tools they need to enhance the risk management posture of their organizations.

The 2023 Forum focuses on the current challenges and risks facing electric utilities. After attending the Forum, participants will have:

- Gained knowledge regarding the current economy
- Gained an understanding of the 2023 banking debacle and how to assess their bank credit risk
- Understood what other electric utilities are exploring regarding Distributed Energy Resources
- Gained knowledge regarding physical security threats and mitigation strategies
- Understood how implementing enterprise risk management can improve company culture
- Understood what other electric utilities are doing to reduce their carbon footprint
- Gained knowledge regarding how other companies are managing their organizations to promote the reliability of the grid, address supply chain issues, and mitigate cyber security threats
- Gained knowledge regarding how other companies are managing their organizations to promote the reliability of the grid, ensure resource adequacy, manage megaloads, address supply chain issues, implement an enterprise risk management program, and evaluate opportunities associated with the Inflation Reduction Act
- Learned what the ISOs and RTOs are doing to promote the reliability of the grid and ensure resource adequacy
- Learned how they can adapt their organizations to better manage the current industry challenges and the way employees work today
- Gained knowledge regarding the enterprise risk management programs of other utilities
