

2025 ACES Risk Managers Forum

CPE Information and Disclosures

September 18 - 19, 2025

Overview

The annual ACES Risk Managers Forum (Forum) provides education and information in the form of subject matter expert presentations and panel discussions. The purpose of the Forum is to give individuals with risk oversight and risk management responsibilities the opportunity to network with each other, discuss the current challenges facing electric utilities, and obtain information and tools they need to enhance the risk management posture of their organizations.

The 2025 Forum focuses on the current challenges and risks facing electric utilities. By attending the Forum, participants will be able to:

- Gain knowledge on the current economy and capital market landscape
- Understand the current demand for new nuclear projects and the status of new nuclear deployment
- Understand how the structured markets are tackling the resource adequacy challenge
- Gain knowledge on the current state of the electric grid and the steps being taken to ensure reliability
- Understand the risks associated with artificial intelligence (AI) and how it is being employed to optimize performance
- Learn about initiatives the new Administration is taking to “Unleash American Energy” and the impact on the future generation mix
- Learn best practices to increase effectiveness of construction risk management
- Gain knowledge on what other G&Ts are doing to enhance their value to their distribution cooperative members
