

2026 ACES Risk Managers Forum

CPE Information and Disclosures

August 20-21, 2026

Overview

The annual ACES Risk Managers Forum (Forum) provides education and information in the form of subject matter expert presentations and panel discussions. The purpose of the Forum is to give individuals with risk oversight and risk management responsibilities the opportunity to network with each other, discuss the current challenges facing electric utilities, and obtain information and tools they need to enhance the risk management posture of their organizations.

The 2026 Forum focuses on the current challenges and risks facing electric utilities. By attending the Forum, participants will be able to:

- Understand the current economy, capital markets, and political climate
- Learn how cognitive biases can influence risk management strategies
- Gain knowledge regarding the current resource planning challenges and what other organizations are doing to overcome those challenges
- Understand the rapid load growth driven by data centers and its implications for cooperatives – focusing on opportunities, risks, mitigation strategies, and navigating demand in the PJM market but with applications nationwide
- Gain knowledge regarding risk management approaches to address natural gas constraints
- Learn how cooperatives are leveraging artificial intelligence to deliver measurable value in their operations
- Understand how integrating enterprise risk management with strategic planning can improve strategy implementation

Event Registration

To register for this event go to:
